

## HANDBOOK OF FAMILY PSYCHOLOGY

EDITED BY JAMES BRAY, PH.D.  
AND MARK STANTON, PH.D.

*LIOS / Saybrook congratulates Tim Weber, Ph.D., and Cheryl Cebula, MSW, LIOS Systems Counseling faculty, on the inclusion of their essay "Intensive Family-of-Origin Consultation: An Intergenerational Approach" (Chapter 18) in Handbook of Family Psychology.*

**Dr. Weber writes:** As you see in the Editorial Reviews, this book will become the standard volume for therapists, students, teachers, and researchers in the entire field of family psychology. We are honored to be included in the seminal volume that will have global distribution. We believe our chapter on family of origin consultation will help further intergenerational therapy and research and will introduce readers to a novel and systemic way of assisting families in becoming more whole and resilient. We hope our chapter sparks further interest and imagination in the field of intergenerational therapy as it also illuminates LIOS / Saybrook as a primary context for the teaching and integration of family of origin theory and practice.
